

What **SATATRACK** Needs From You!

The SATATRACK team designed this to help both of us. You can get a feel for the types of questions we are going to ask and the information we will request when talking about your specific need. We have found that most people don't know their specific need or specifically what they want- and we like this! Receiving the requirements is one of the most important steps to custom engineering a solution that is JUST RIGHT FOR YOU!

This oval is the 'Infinite Solutions' the **SATATRACK** team can provide.

Tell Us Your Story!

Everyone is unique, and has a different story, and we LOVE that! We love hearing the stories of how you found us, what we can do for you, why you need a remote monitoring, asset tracking or asset management solution. If you tell us your story, we can pick some of the details out and work from there!

These questions will help us determine the specifications you need.

Our design team will have all the parameters and needs to custom engineer YOUR solution.

What We Need From You: Questions

- 1 Is your asset moving or stationary?
- 2 Is your asset traveling internationally or domestically?
- 3 How many assets need to be monitored?
- 4 Does your asset require any specific classifications?
(3A, CL 1/DIV 1, CL 1/DIV 2)
- 5 Is on-site power available?
- 6 Would you like to use on-site power?
- 7 Is your asset exposed to weather and other harsh elements?
- 8 Would you like self-contained power?
- 9 How long do you need self contained power?
- 10 What type of chemical, liquid, solid or particle needs to be monitored?
- 11 What are the specifications of the container systems?
- 12 How many assets need to be monitored?
- 13 Do you want stand-alone or cabled solutions?
- 14 Are solar panels acceptable?
- 15 How accurate does your data need to be?
- 16 Do you need an interactive display on your solution?
- 17 How often do you need your data updated and reported?
- 18 Do you need a specific report type or have specific reporting criteria?
- 19 Is there a specific mode you would like your data communicated?
- 20 Is there internet capability on-site?
- 21 Is there a specific time of day you need your data reported?
- 22 Does your asset have any specific restrictions like pressure, or volume?
